## **OPERATING SYSTEMS**

## ASSIGNMENT – 7 DISK SCHEDULING ALGORITHMS REPORT

|                         | FCFS    | SSTF | SCAN  | C_SCAN | LOOK  | C_LOOK |
|-------------------------|---------|------|-------|--------|-------|--------|
| Total seek operations   | 1670594 | 7490 | 7495  | 9995   | 7486  | 9957   |
| Average seek operations | 1670.59 | 7.49 | 7.495 | 9.995  | 7.486 | 9.957  |

Here, we observe that SSTF and LOOK are very close in the total seek operations.

So, SSTF and LOOK improve and increase the throughput.

The screenshots of the results are attached for reference.
